

The Texas-New Mexico Power (TNMP) Commercial Solutions Program offers select commercial electric distribution customers both cash and non-cash incentives for implementing energy efficiency improvements in 2010. These incentives will be available for qualifying measures in new construction and retrofit projects.

The Commercial Solutions Program is designed for commercial electric distribution customers within the TNMP service territory. The program will provide direct support, tools, and training necessary to assist customers in:

- 1) Identifying, evaluating, and undertaking efficiency improvements
- 2) Properly evaluating energy efficiency proposals from vendors
- 3) Overseeing opportunities to their completion
- 4) Understanding how to leverage energy savings to finance projects

The program is being offered at **no cost** to eligible participants. This is a **voluntary program** that offers objective, third party consulting on best practices in the areas of energy usage and energy efficiency. **It is important to note that no products or services are sold through this Program.**

The TNMP Commercial Solutions Program includes:

- Technical Assistance to help identify and evaluate energy efficiency opportunities as well as administrative program management
- Cash Incentives (\$175 per kW) for new construction and retrofit/renovation projects that reduce peak kW demand
- Communication Support to help publicize community leadership and accomplishments of the customer in the area of energy efficiency

Please contact CLEAResult Consulting or TNMP if you have any questions about program participation.
