

ENERGY EFFICIENCY PROGRAMS BULLETIN

HVAC Tune-Up Season is Here

With the arrival of summer heat, HVAC systems are in operation more than any other time of year. Did you know that TNMP will pay an HVAC contractor to perform a comprehensive tune-up on your DX HVAC system? Please let your program representative know if you are interested in receiving a free CoolSaver HVAC tune-up.

Project Spotlight

ALVIN COMMUNITY COLLEGE

In 2019, the TNMP SCORE program team began working with Alvin Community College (ACC) on a comprehensive campus renovation scheduled to span multiple years. The scope included remodeling and renovation of multiple buildings, HVAC replacements, central plant upgrades and a campus-wide interior and exterior lighting retrofit. The project was split into three phases allowing the college to earn over \$40,000 of incentives over the course of 2020, 2021 and 2022 combined. This multi-phase approach is one way the SCORE

Program can support our partners and accommodate difficult project timelines. No matter how much or little time an equipment upgrade is expected to take, connect with the program team so we can discuss the best way to enroll for cash incentives.

Project Spotlight

COMFORT INN & SUITES – GATESVILLE

The Comfort Inn & Suites in Gatesville recently installed a photovoltaic system on the roof of their facility. The PV system is estimated to save the city over 92,000 kWh annually. The estimated kWh reduction from this project is equivalent to the carbon sequestered by 77 acres of U.S. forests in one year—or the greenhouse gas emissions avoided by 22.6 tons of waste recycled instead of landfilled.

2022 Project Pipeline

We are now past the midway point for 2022. Many program participants have already submitted projects and received cash incentives. We are still accepting new applications, but the dollars are going fast. Don't hesitate to contact us about any upcoming project opportunities so we can schedule a pre-inspection and begin the enrollment process.

Opportunity Assessments

Our team is offering no-cost Opportunity Assessments for commercial facilities in the TNMP territory. An assessment includes a member of our team performing an audit of your facility to help identify opportunities for energy efficiency upgrades. If you are interested in having an Opportunity Assessment performed at your facility, please let us know!
